Bev,

As a non-smoker I ought to be behind this ban, however, I urge you to VOTE NO because it is non-enforceable. Admin cannot even back up Campus Security who try to give parking tickets. Who will be the cigarette police? We have many, many more pressing problems that are not being addressed.

To make a biblical comparison, this smoking policy fusses over the splinter in someone else's eye, instead of the log in our own.

Bev,

The only thing I see unfair in this policy is the ban of the electric cigarettes that one might use to help them stop smoking. Other than that it will be very difficult for me to enforce this at the Highlands but I will do as the policy states if passed.

Thank Bev!

Hi Bev,

This is my official response to Policy 47: Although I am a non-smoker and I do not like to be around second-hand smoke, I feel the smokers on campus (faculty, staff & students) should have designated areas to "light up" if they feel the need. These areas should be away from direct walkways & doorways where non-smokers would have to walk through their cloud of smoke to get to their destination.

The smoking areas could possibly be located behind/next to certain buildings that are adjacent to the roads (ex: behind Shotwell, Fine Arts, Science, ASRC and the Library etc. and maybe spots in the parking lots) just a thought!!!! If the smokers are allotted a smoking area, they should be responsible enough to keep that area "butt free" or as clean as possible.

Bottom line is: I don't feel it is my right to take away another's right.

Thanks for asking for my input!
