**Validation date** : 4/2/2007.

**In case of emergency**

- 800-424-9300 CHEMTREC (USA)
- 613-996-6666 CANUTEC (Canada)
- 24 Hours/Day: 7 Days/Week

## Section 2. Hazards Identification

**Physical state** : Solid. (Crystals.)

**Odor** : Odorless.

**OSHA/HCS status** : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

**Emergency overview**

**DANGER!**

MAY BE FATAL IF INHALED OR SWALLOWED. CAUSES RESPIRATORY TRACT, EYE AND SKIN BURNS. HARMFUL IF ABSORBED THROUGH SKIN. MAY CAUSE DAMAGE TO THE FOLLOWING ORGANS: HEART, CENTRAL NERVOUS SYSTEM.

Do not ingest. Do not get in eyes or on skin or clothing. Do not breathe dust. Keep container closed. Use only with adequate ventilation. Wash thoroughly after handling.

**Routes of entry** : Dermal contact. Eye contact. Inhalation. Ingestion.

**Potential acute health effects**

- **Eyes** : Corrosive to eyes. Dust may cause mechanical irritation to eyes.
- **Skin** : Toxic in contact with skin. Corrosive to the skin.
- **Inhalation** : Very toxic by inhalation. Corrosive to the respiratory system.
- **Ingestion** : Very toxic if swallowed. May cause burns to mouth, throat and stomach.
- **Carcinogenic effects** : No known significant effects or critical hazards.
- **Mutagenic effects** : No known significant effects or critical hazards.
- **Teratogenicity / Reproductive toxicity** : No known significant effects or critical hazards.

**Medical conditions aggravated by over-exposure**

Repeated skin exposure can produce local skin destruction or dermatitis. Repeated or prolonged exposure to the substance can produce lung damage. Repeated or prolonged exposure of the eyes to a low level of dust can produce eye irritation. Repeated or prolonged exposure to the substance can produce target organs damage.

See toxicological information (section 11)

Section 4. First Aid Measures

Eye contact
Get medical attention immediately. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Chemical burns must be treated promptly by a physician.

Skin contact
Get medical attention immediately. Flush contaminated skin with plenty of water. Continue to rinse for at least 10 minutes. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing or wear gloves. Chemical burns must be treated promptly by a physician. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Inhalation
Get medical attention immediately. Move exposed person to fresh air. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Ingestion
Get medical attention immediately. Wash out mouth with water. Remove dentures if any. Move exposed person to fresh air. Keep person warm and at rest. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Protection of first-aiders
No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing or wear gloves.

Section 5. Fire Fighting Measures

Flammability of the product
No specific hazard.

Extinguishing media
Suitable: Use an extinguishing agent suitable for the surrounding fire.
Not suitable: None known.

Special exposure hazards
Not available.

Special protective equipment for fire-fighters
Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental Release Measures

Personal precautions
Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment.

Environmental precautions
Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Methods for cleaning up
If emergency personnel are unavailable, vacuum or carefully scoop up spilled material and place in an appropriate container for disposal by incineration. Avoid creating dusty conditions and prevent wind dispersal.

Continued on Next Page
Section 7. Handling and Storage

Handling: Do not ingest. Do not get in eyes or on skin or clothing. Keep container closed. Use only with adequate ventilation. Do not breathe dust. Wash thoroughly after handling.

Storage: Keep container tightly closed. Keep container in a cool, well-ventilated area.

Section 8. Exposure Controls/Personal Protection

<table>

</tr>
</tbody>
</table>

Consult local authorities for acceptable exposure limits.

Engineering measures: Use only with adequate ventilation. If user operations generate dust, fumes, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Personal protection

Eyes: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. Recommended: face shield

Skin: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Body: Recommended: Full suit. and gloves. Feet: Recommended: Boots.

Respiratory: Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. Recommended: Vapor respirator. Be sure to use an approved/certified respirator or equivalent. Vapor respirator or self-contained breathing apparatus (SCBA).

Hands: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Hygiene measures: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Section 10. Stability and Reactivity

Stability and reactivity: The product is stable.
Incompatibility with various substances: Reactive or incompatible with the following materials: acids.
Hazardous polymerization: Will not occur.

Section 11. Toxicological Information

Toxicity data
Chronic effects on humans: CARCINOGENIC EFFECTS A4 (Not classifiable for humans or animals.) by ACGIH. May cause damage to the following organs: heart, central nervous system (CNS).

Other toxic effects on humans:
- Extremely hazardous in case of ingestion.
- Very hazardous in case of skin contact (permeator), of inhalation (lung irritant).

Specific effects
- Carcinogenic effects: No known significant effects or critical hazards.
- Mutagenic effects: No known significant effects or critical hazards.
- Teratogenicity / Reproductive toxicity: No known significant effects or critical hazards.

Sensitization
- Ingestion: May cause burns to mouth, throat and stomach.
- Inhalation: Corrosive to the respiratory system.
- Eyes: Corrosive to eyes. Dust may cause mechanical irritation to eyes.
- Skin: Corrosive to the skin.

Section 12. Ecological Information

Environmental precautions: No known significant effects or critical hazards.
Products of degradation: Some metallic oxides.
Toxicity of the products of biodegradation: The products of degradation are less toxic than the product itself.

Section 13. Disposal Considerations

Waste disposal: The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

RCRA classification: Code: (C)

Disposal should be in accordance with applicable regional, national and local laws and regulations. Local regulations may be more stringent than regional or national requirements.

The information presented below only applies to the material as supplied. The identification based on characteristic(s) or listing may not apply if the material has been used or otherwise contaminated. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste identification and disposal methods in compliance with applicable regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.

Section 15. Regulatory Information

**United States**

**HCS Classification**
- Highly toxic material
- Corrosive material
- Target organ effects

**U.S. Federal regulations**
- TSCA 8(b) inventory: Listed
- SARA 302/304/311/312 extremely hazardous substances: No products were found.
- SARA 302/304 emergency planning and notification: No products were found.
- SARA 302/304/311/312 hazardous chemicals: No products were found.
- SARA 311/312 MSDS distribution - chemical inventory - hazard identification: Barium Hydroxide, Octahydrate: Immediate (acute) health hazard

Clean Water Act (CWA) 307: No products were found.
Clean Water Act (CWA) 311: No products were found.
Clean Air Act (CAA) 112 accidental release prevention: No products were found.
Clean Air Act (CAA) 112 regulated flammable substances: No products were found.
Clean Air Act (CAA) 112 regulated toxic substances: No products were found.

**State regulations**
- Pennsylvania RTK: Barium Hydroxide, Octahydrate: (environmental hazard, generic environmental hazard)
- New Jersey: Barium Hydroxide, Octahydrate

**Canada**

**WHMIS (Canada)**
- Class D-1B: Material causing immediate and serious toxic effects (Toxic).
- Class E: Corrosive material

**CEPA DSL/CEPA NDSL**
- No products were found.

This product has been classified according to the hazard criteria of the CPR and the MSDS contains all the information required by the CPR.

**EU regulations**

**Risk phrases**
- This product is not classified according to EU legislation.

**International regulations**

**International lists**
- Australia (NICNAS): Barium Hydroxide, Octahydrate
- China: Barium Hydroxide, Octahydrate
- Philippines (RA6969): Barium Hydroxide, Octahydrate

Section 16. Other Information

Label requirements

- DANGER!

- MAY BE FATAL IF INHALED OR SWALLOWED.
- CAUSES RESPIRATORY TRACT, EYE AND SKIN BURNS.
- HARMFUL IF ABSORBED THROUGH SKIN.
- MAY CAUSE DAMAGE TO THE FOLLOWING ORGANS: HEART, CENTRAL NERVOUS SYSTEM.

Notice to reader

The statements contained herein are based upon technical data that EMD Chemicals Inc. believes to be reliable, are offered for information purposes only and as a guide to the appropriate precautionary and emergency handling of the material by a properly trained person having the necessary technical skills. Users should consider these data only as a supplement to other information gathered by them and must make independent determinations of suitability and completeness of information from all sources to assure proper use, storage and disposal of these materials and the safety and health of employees and customers and the protection of the environment.
